

GOVERNMENT COLLEGE OF ENGINEERING AND TECHNOLOGY JAMMU

No:- GCET/Pr/23/951

Dated:05.12.2023

The Principal/Director,

Sub: Energy Conservation week from 8th -14th December,2023 at GCET, Jammu.

Sir/Madam,

1. It gives me immense pleasure to inform that Government College of Engineering and Technology (GCET), Jammu, with the support of Bureau of Energy Efficiency, Ministry of Power and J&K Power Development Department, is celebrating National Energy Conservation (EC) week from 8th – 14th December, 2023.
2. During the week, we are organizing various events to create awareness and cultivate a culture of energy conservation & sustainable practices among the youth. The details of the events are as follows:
 - a. Paper presentations on theme topics "Emerging Trends in Energy Efficiency- Opportunities and Challenges".
 - b. Invited talks by eminent Resource persons
 - c. Poster making and Slogan competitions
3. In this direction, with the help esteemed organisations mentioned above, this institute has also launched a **4E wave** – A National Student led Movement towards Energy Conservation and sustainable future. To facilitate the movement/campaign, a web portal – www.4ewave.com has been developed which will provide an interactive platform to the students and citizens nationwide for information and resource sharing related to energy conservation. Detailed information regarding the aforementioned events and terms & conditions for participation are accessible on the portal.
4. We request you to kindly motivate your students to be part of this impactful journey towards energy conservation by registering on the said portal and participating in events and contests being organised at the national level during the forthcoming Energy Conservation week.
5. To register, participants need to provide basic details such as Name, email, contact number and name of State/UT on the portal. The students, who do not have email/contact number, may use the details of their parents for registration purpose, which would serve as a communication link for future correspondence. The participants on registration will also receive a Certificate of acknowledgement, which will be downloadable from the portal.

6. I feel that with your august intervention and support, we can celebrate the energy conservation week with full fervour and enthusiastic participation of the youth—who are the key players in shaping sustainable energy practices and the environmental future. I further, request you to spread a message to the general public through your students:

“To switch off their non-essential lights and heating/cooling appliances between 7 pm to 9 pm during this week and beyond”

With Regards

Principal GCET, Jammu

&

Dean(Engineering),University of Jammu.
