Report on the Second Day of Environment Week 2026

The second day of **Environment Week 2026** was observed on 6 June 2026 with the organization of an Online Painting Competition by the Department of Environmental Science in collaboration with the Department of Botany and NSS Wing of Government Degree College Sopore. The event was conducted under the theme "Inspired by Nature. For Climate. For Our Future."

The competition aimed to promote environmental awareness and encourage students to express their understanding of environmental issues through creative artwork. Students from different semesters of the college enthusiastically participated in the competition and prepared paintings on themes such as environmental conservation, biodiversity, climate change, sustainable living, and protection of nature. As per the guidelines issued through the official notice, participants submitted the soft copies (photographs/scanned copies) of their paintings along with their details to the **official email ID of the Department of Environmental Science** (evsgdcsoopore@gmail.com) on 6 June 2026. The online mode of participation enabled students to contribute actively to the celebrations while showcasing their artistic talents and environmental consciousness.

The paintings reflected a wide range of environmental concerns and innovative ideas for promoting sustainability and conservation. Through their creative expressions, students highlighted the importance of protecting natural resources, preserving biodiversity, reducing pollution, and adopting eco-friendly lifestyles.

The submitted entries will be evaluated by a panel of judges during the **Valedictory Function of Environment Week 2026**. The results of the competition will be announced during the concluding ceremony, and certificates and prizes will be awarded to the outstanding performers.

The event successfully provided a platform for students to combine creativity with environmental advocacy and contributed meaningfully to the objectives of Environment Week 2026 by fostering environmental responsibility and awareness among the student community.

Report prepared by

Dr. Sana Shafi
Head, Department of Environmental Science
Government Degree College Sopore.
